

Managed Care is MAJOR ISSUE and it should NOT be rushed through!

It will directly affect the lives of 560,000 recipients, plus the multitude of the providers cross the state and the subcontractors who provide cares to those that receive Medicaid benefits.

It is ridiculous that you are only allowing Public Comment for a total of 60 minutes, broken up into two 30 minute sessions.

Then only allowing 30 minutes for discussion and decide on what steps to take next. It does not appear that the committee will take any of the public comments into consideration during this time.

Don't you think that over a million people's lives deserve a little more time to decide the best steps to take next.

You are in a position to serve the people. This is most definitely not serving the people.

I have been a licensed nursing home administrator for 26 years. My license is up for renewal January 1, 2016, the same date that Managed Care will be going into effect. I will not be renewing my license.
